Profile

I am bright and learn fast. I want to work in a supportive and collaborative environment with folks who write clean code, create quality products, use an intentional engineering process, and think critically about the space we take up working in tech in the Bay Area.

Education

Bachelor of Arts, Computer Science, UC Berkeley Dec 2014
Minor, Forestry and Natural Resources
3.51 GPA

Experience

Software Engineer, *Capital One Finance* Jul 2015 – Present

- Re-platformed internal web app from force.com backend to graph database on internal AWS environment with four person team
- Implemented dependable Node and Express proxy server to house assets in AWS S3, 90% test coverage
- Planned and developed access control for new API using Node and Redis
- Improved a Tableau dashboard visualizing open source contributions at C1 using D3

Implementation Consultant, *Berkeley Student Cooperative* Oct 2014 – Jun 2015

- Managed transition process for housing software upgrade
- Streamlined business processes to take advantage of new system
- Lead weekly meetings and train housing and bookkeeping department staff

Software Engineering Intern, *Vertigo Software, Inc* Jun 2013 – Oct 2013

- Created Roku Proof of Concept streaming app for potential client
- Contributed to Windows Phone 8 Redbox Instant app

Skills

Code clarity, organization, and documentation. Asking questions. Attention to detail. Clear and concise oral presentation. Meeting Facilitation.

Most recently used: Git/Github, AWS, Jenkins, Node, Express, Angular2, React
Previously used: Java, Bash, R, D3, SQL, Tableau, C/C#

Extras

Other Work Accomplishments

- Taught middle school students coding with C1 Coders program
- Presented findings at internal software engineering conference
- Facilitated public speaking workshop at C1 Women's Network Summit
- Planned fireside chat event with guest speaker for Women in Tech Organization
